

# Build IT!

Build your future piece by piece

A strategic partnership for adult education

## ABOUT THE PROJECT

 BUILDIT - Build your future piece by piece is an innovative Erasmus+ project developed by five European partners.

Launched in November 2020 and lasting 24 months, the project aims to design and share an innovative pedagogical methodology called Building Based Upskilling (BBU). BBU is a learning method based on building games, such as building blocks, puzzles and other materials from which one can create and build.

 The target audiences of the project are:

- Professionals involved in adult education,
- NEETs and low skilled adults.

 The final goal of the project is the production of a handbook for educators for adults.

This manual will provide an innovative and interactive methodology for teaching and learning key competences for employability.
